**Apps**: [https://goodbaes.github.io/portfolio/index.html](https://goodbaes.github.io/portfolio/index.html)

**Profile**

Experienced Dart/Flutter developer with proven leadership skills. Skilled in building mobile applications from scratch, optimizing development processes, and implementing efficient CI/CD pipelines. Adaptable to diverse roles – from UI and business logic development to architectural planning and team management. Created interactive mini-games using the Flame Framework to enhance performance and simplify the implementation of game mechanics.

**Key Skills**

**Languages & Frameworks:** Dart, Flutter, Flame, WebView

**State Management:** Bloc, GetX, Riverpod

**CI/CD:** Codemagic, build process optimization

**Backend & APIs:** REST API, GraphQL, Supabase, Firebase

**Databases & Storage:** Hive, Firestore, Drift(SQLite)

**Other:** Oracle Cloud, RevenueCat, Qonversion, Appsflyer, SKAdNetwork, auto_route, Sentry

**Professional Experience**

**Tech Lead – Subscription App Development Team**

*November 2022 – Present*

- Led a development team, making key technical decisions and planning application architecture.
- Set up CI/CD pipelines (Codemagic), reducing build times from 30 minutes to 10 minutes and boosting development speed.
- Increased annual app output from 2 to 3 apps (plus a reskin of an older app) through improved processes.
- Implemented test keys on a remote server to streamline builds for QA, reducing communication overhead with developers.

## Mobile App – Beauty Experts Booking & Search

*February 2022 – September 2022*

- Developed a mobile app for Android and iOS from scratch, including UI and business logic.
- Implemented features for expert search, service booking, and user reviews.
- Technologies: Flutter, REST API, Redux, Firestore.

## Mobile App – Food Delivery

*September 2021 – January 2022*

- Created a food delivery application for Android and iOS from scratch and deployed it to Play Market and App Store.
- Technologies: Flutter, REST API, GetX, Firestore, Firebase, Codemagic.

## Web App – CRM System

*January 2022 – March 2022*

- Added new functionalities with a focus on UI/logic development and test writing.
- Technologies: Flutter, AWS GraphQL, Freezed, Bloc, Cubit, GetIt, Unit Tests (Mockito).

## Other Projects:

- Mobile app for fitness and home workouts (integration with digital shopping modules via StoreKit and media player components).
- Projects include additional mobile apps for food delivery, an automated trading system, an online marketplace for media files (NFT), a "Diary" app, and a grocery online marketplace with GIS, payment integration, and localization.
- Involved in UI, business logic development, and integration with various external services (GIS, Google Maps, payment modules).

## Simple Apps

*January 2019 – September  2021*

*flutter developer, in outsource startup. making mobile ios and android apps + graphql*

**Education**

**Institute of Mining and Mining Technologies**

*Department of Geology, Oil & Gas Engineering*

2013 – 2018

**Languages**

- Russian – Native

- English – Intermediate
